Career Summary

Starting with an interest in EE, I moved to CS for the innumerous ways it can be applied to better our lives. I aim to master frontend skills first, then move to the backend with Node.js to focus my career on the full stack.

Skills

Technical Skills:

- HTML/CSS/JavaScript
- React
- Calling/Consuming RESTful API's
- SASS/SCSS
- MongoDB

Soft Skills:

- Tutored for French language (Certified Tutor in High School)
- Volunteered at Goodwill drive thru for **160 hours** meeting donors, helping unload donations, and developing meaningful relationships with employees

Experience

News App / React, Firebase, RESTful API

- **Full Stack** application using the Bing News Search API for latest news stories via category or search bar
- Authenticates users through Firebase Authentication **REST API**
- Implements **Database** storage of users' data using Firebase Realtime Database
- Tracks previous API calls for smoother client performance and efficient API usage

LinkedIn Profile Page Clone / SASS

- Implements **SASS** for code and file organization
- Combines various CSS topics including Flexbox, Grid, Margin Collapsing, Navigation, Specificity, etc..

More projects are posted in my GitHub.
